Education

M.Sc. in Electrical Engineering – Control Systems Oct 2018 – Sep 2021
K. N. Toosi University of Technology - Tehran, Iran
Thesis title: Fault Detection and Isolation from Cyber-Attack in SCADA Systems Based on Network Parameters

B.Sc. in Electrical Engineering Oct 2014 – Sep 2018
Amirkabir University of Technology (Tehran Polytechnic) - Tehran, Iran
Final Project: Irrigation Control System using IoT

High School Diploma 2010 – 2014
Shahid Mofatteh High School - Jahrom, Fars, Iran

Research Interests

Learning-based control and reinforcement learning for robotic systems
Deep learning for safe and reliable control of cyber-physical and medical robotic systems
Artificial intelligence and machine learning for robotics
Combining model-based control theory (stability, robustness, fault detection) with data-driven methods for trustworthy decision-making

Honours & Achievements

Ranked 4th top student BSc Amirkabir in Control

Ranked 272nd among 83,262 participants in the Konkur (Iranian National University Entrance Exam) for Engineering - Summer 2014

Top student among all students of Jahrom in the third grade of high school - Summer 2013

Projects

Fault Detection and Isolation from Cyber-Attack in SCADA Systems Based on Network Parameters *(M.Sc. thesis project)* - Designed a method to tell physical faults apart from cyber-attacks in a networked control system, combining fault-detection-filter residuals with network parameters such as delay and traffic, and tested it in OMNeT++ simulations.

Irrigation Control System using IoT *(B.Sc. final project)* - IoT-based automated irrigation with soil-moisture sensors and solenoid valves on ESP32 nodes, connected over MQTT to a Raspberry Pi server with a web dashboard for real-time monitoring and manual or automatic valve control.

BLDC Motor Control with Sliding Mode Controller - Speed/torque control of brushless DC motors using sliding mode technique.

Least Squares Iterative System Identification (MATLAB) - Implemented LSI parameter-estimation algorithms for multivariable CARMA, Box-Jenkins and Wiener nonlinear systems and compared them with recursive least squares in simulation.

IT Ticketing System (Python & SQL) - Web-based system for creating, tracking, and managing IT support tickets.

Laboratory Visit Report Logging System (Python & SQL) - Database application to record and store lab visit reports.

UGV Robot Control via Web (Arduino + Raspberry Pi) - Remote web interface for controlling an unmanned ground vehicle.

Traffic Control Simulation using Simulink - Model and simulate traffic signal and flow control systems.

Basic Controllers for Hybrid Vehicles (Matlab) - Design of fundamental control strategies for hybrid electric vehicles.

PID Controller for DC Motor (Simulink + Arduino) - Real-time PID speed control of a DC motor with Arduino and Simulink.

Work Experience

IT Specialist at National Standards Organization of Iran (INSO) Dec 2022 – Oct 2024

- Designed and implemented an IT ticketing system using Python and SQL
- Developed a laboratory visit report logging system using Python and SQL
- Managed internal information and communication technology infrastructure

Technical Skills

Control, modelling, and simulation: Control systems; dynamic-system modelling; fault detection and isolation; cyber-physical systems; MATLAB/Simulink; OMNeT++; networked control systems.

Machine learning and deep learning: Supervised learning; model evaluation; neural networks; CNNs for visual recognition; RNNs, GRUs, and LSTMs for sequential data; Transformers; transfer learning; hyperparameter tuning; regularization; optimization methods including Adam and RMSprop; TensorFlow/Keras.

Generative AI and LLM engineering: LLM application development; prompt design; frontier and open-source models; Hugging Face; LangChain; Gradio; retrieval-augmented generation (RAG); embeddings and vector databases; LoRA/QLoRA fine-tuning; multimodal LLM applications; function calling and agentic workflows.

Programming and software: Python; SQL; Git; Linux; web application development; data processing; Jupyter notebooks.

Embedded Systems & Hardware: Arduino, ESP32, Raspberry Pi, PLC (Programmable Logic Controllers)

Languages

English - IELTS Academic: 6.5 (Overall)

Listening: 7.5 | Reading: 6.5 | Writing: 6.0 | Speaking: 6.0

Taken: October 2025
